Front-End Developer

I am a highly motivated, detail-oriented junior front-end developer passionate about creating visually appealing, intuitive, and user-friendly interfaces. I am committed to continuous learning and staying updated with industry trends.

With under 1 year of experience in front-end development, I collaborated with a cross-functional team for our Capstone project to deliver high-fidelity designs and an MVP in under one month, impacting local food vendors' marketing in just 2 months.

WORK EXPERIENCE

United States Of Africa • 05/2023 - 06/2024

Product Design Volunteer

- Collaborating with other designers to create interactive high-fidelity designs on Figma and iterate them based on feedback.
- Delivering feedback through the scrum methodology during daily stand-up meetings.
- Ensured ongoing iteration of designs, ensuring the development team got all the necessary designs on time; and maintaining the design system.
- Ensured ongoing iteration of designs, ensuring the development team got all the necessary designs on time; and maintaining the design system.

EDUCATION

in Front-end software development

Tech4dev • Online • 10/2023 - 11/2024

I have just completed 6 months of rigorous training in Frontend software development with the Tech4dev fellowship program.

Bachelors of Education in English and Literature

Kenyatta University • Nairobi, Kenya • GPA: Second class Upper division • 09/2014 - 07/2019

CERTIFICATIONS

Programming with JavaScript • 01/2024 - 03/2024

Meta

Introduction to Front-End development • 11/2023 - 12/2023

Meta

Product Design • 01/2023 - 02/2023

Tech4dev

UX Design • 08/2022 - 01/2023

Google

PROJECTS

Local Dish Corner • 03/2024 - 04/2024

Tech4dev

- I used React to create a Web app that connects vendors to customers and vice versa.
- I worked with a cross-functional team to deliver a marketing solution to local food vendors. Local vendors were having a hard time getting their business visible to potential customers.
- Our solution was to create an webapp for both customers and vendors to showcase the various local food vendors and their cuisines.
- Customers get access to vendors with a variety of food options. While vendors get a dashboard with analytics that helps them monitor the data coming into their sites. They can monitor the top dishes customers buy, top clicks, reviews and total visits while still getting information on their revenue.
- We came up with an MVP that made it to one of the top 20 Capstone projects in our cohort.

VOLUNTEERING & LEADERSHIP

Tech4dev • 03/2024 - 03/2024

TechGirl Drive • Nairobi, Kibera

Took part in the tech drive facilitated by Tech4dev where we went to Kibera Primary School to teach young girls about their future in STEM subjects and encouraged them to participate more in STEM subjects.

Kenyatta Univeristy • 09/2018 - 12/2018

Leadership Training • Nairobi, Nairobi

I participated in a leadership training session and received a certificate with distinction

SKILLS

Technical Skills: Adobe XD and Figma, Bootstrap, CSS, Git and Github, HTML, JavaScript, React JS

Soft Skills: Analytical thinking, Collaboration, Effective communication, Time management
